

Construct*Connect: Construction Data Communication System

With a cell phone,
you can talk to the job site.

With ConstructConnect,
you're there.

ConstructConnect is a mobile construction data communication system that makes your project team more productive and your billing more accurate.

Make Your Information Mobile »

For years, construction firms have used cell phones to save time and money. The ConstructConnect system offers even greater returns by letting on-site and off-site personnel quickly and easily share project information like CAD drawings, photographs, sketches, notes and digital forms.

Solve Job Site Problems Faster »

On a job site, things move fast and a problem can stop work just as quickly. When work stops you lose money. ConstructConnect reduces down time by keeping everyone on top of the latest issues – without expensive travel. Problems get solved and work goes on.

Document Every Job Site Issue »

If it's not written down, it doesn't exist. With ConstructConnect you can write it down, photograph it, sketch it, get it signed, and enter it into a database. That means you can improve your ability to track and bill for changes and you'll know who's responsible for any issues.

ConstructConnect lets you:

- » Improve change order billings.
- » Reduce travel time.
- » Improve job site accountability.
- » Identify and document job site issues – when they happen.
- » Communicate important information to the project team immediately.
- » Automate paper – never enter information twice or lose another piece of paper.
- » Connect anywhere a cell phone works.

MAKE BLUEPRINTS GREEN WITH ENVY

The ConstructConnect Tablet goes anywhere paper can go. But with ConstructConnect, there's no paper to lose, no way to misfile forms, and you never have to write down a piece of information twice.

The best news? With the ConstructConnect Forms Engine all those paper forms you used to have on the job site look exactly the same on the tablet – but now they're smarter. You can use them to enter and immediately send information to the office or suppliers via fax or email.

Use the ConstructConnect Forms Engine to replace paperwork like:

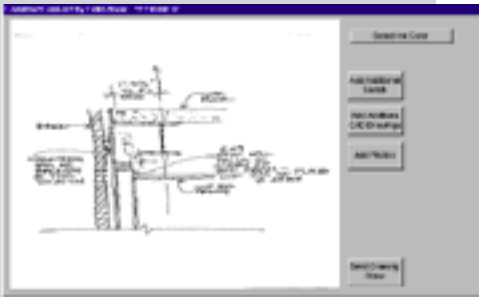

- » Supplies Order Forms
- » Daily Reports
- » Change Orders
- » Time Sheets
- » Safety Reports

View, mark up, and share CAD files.

Take photos and make notes.

Make sketches and notes.

A major mechanical contractor improves their change order billing and improves productivity with ConstructConnect.

Paper, cell phones, and a lot of driving >>

A major mechanical contractor knew they had problems with the way they managed change orders. They were using paper and cell phones to document and communicate change orders. It was a slow, cumbersome process that made it difficult to manage job information and make sure that all the right people had copies of the paperwork.

First, someone on-site had to gather all the different pieces of paper and drive them back to the offices. At the office, another person had to separate and distribute the information to the proper recipient. This process made it easy for information to be delayed or miscommunicated.

The Field2Base challenge >>

At Field2Base, we offered them a free trial of ConstructConnect. If they didn't see improvements in accuracy and productivity, we'd take the system back – no questions asked.

They took us up on our challenge. We loaned them three tablets to use to manage one of their larger projects. Now information gathered on the job site went directly to the people who needed it. There were fewer mistakes and delays. And most issues could be resolved without trips to and from the job site.

At the end of the trial period, the results spoke for themselves. Change order billings were up, drive time was down, and fabrication errors were eliminated. The bottom line? Not only did they decide to keep the first three tablets, they immediately purchased four more!

Learn how ConstructConnect can improve your company's productivity contact Field2Base at (919) 845-5161 or email info@field2base.com.

BUSINESS OWNER >>

"I was able to increase my company's change orders by 15% because ConstructConnect let me track our time and materials better."

SITE SUPERVISOR >>

"Now that I use ConstructConnect to send in my paperwork, I save an hour and a half each day just in driving time alone."

PROJECT MANAGER >>

"With ConstructConnect, I know that my subs and I are always on the same page."
